I tried to apply the 2nd and 3rd coupon code that was created previously by firstcomm and it does not work.

It does not appear on the check out page after I key in the coupon code that I created.

But keeps showing: Success: Your coupon discount has been applied!
It took about 30 mins later to appear after multiple try.

The other 2 coupon code still unable to use. Please advise how.

Warning: You need a minimum order of \$1,850.00 before you can checkout.
